

COMMITMENT TO HEALTHY LIFETHROUGH CLEAN AIR

" CLEAN AIR LEADS TO HEALTHIER FUTURE "

Akiş REIT, as part of its affiliation to the United Nations Global Compact and in line with Healthy and Quality Life (SDG 3) and Climate Action (SDG 13), we commit to working for a better future for "Clean Air, Healthy Life." In this context, we aim to create clean air plans for our company Akiş REIT along with its direct and indirect affiliates Akyaşam Yönetim Hizmetleri A.Ş. and Akasya Çocuk Dünyası A.Ş. (KidZania Istanbul) in the locations operated (Akasya Shopping Mall, Akbatı Shopping Mall, Central and Management Offices and Construction Sites) and we aim to follow up the plans regularly according to international standards.

Our work will be carried out to raise awareness among our subsidiary and indirect partners, tenants, suppliers, and visitors, as well as to identify and reduce emission sources, with the goal of 100 percent clean air for a healthier life.

For these purposes, we accept the following as our responsibility towards a better future:

1. Developing clean air action plans for Akiş REIT's assets in order to identify air pollutants, reduce emissions, and manage air quality,
2. Raising awareness about REIT's measurement of clean air quality and contributing to sectoral development by sharing information in this field,
3. Informing our business partners, suppliers, tenants, and visitors about the importance of air quality protection in order to achieve our common goal of 100 percent clean air, and to provide expert guidance as needed,
4. To act in cooperation with our industry, academy, civil society and the public to increase clean air quality, to create open information platforms, and to be the pioneer of global standards practices in our country.
5. Maintaining our efforts to reduce emissions to a minimum in all circumstances, while remaining aware of the risks posed by air pollutants in our operations and our responsibilities,
6. Keeping indoor air quality higher than outdoor air quality while continuing to monitor real-time air quality through our Akasya and Akbatı shopping centers' mobile applications,
7. Making it easier for our tenants' employees and visitors to get to and from our shopping malls by using public transportation, bicycles, and electric vehicles,
8. Conducting information activities and campaigns in order to raise awareness among the public, particularly among youth and students.

Clean air leads to healthier future.
